## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-24 allowed. The following is an examiner's statement of reasons for allowance: While the prior art teaches the use of a PFM with a fixed current threshold or a variable current threshold, no motivation exists to combine the two into a dual mode controller.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gan (US 20050056399) discloses a dual mode burst converter but lacks an earlier date. Esteves (US 6,724,174) discloses a converter with a forced continuous mode and a burst mode with a variable threshold but lacks a fixed threshold. Baldwin (US 6,696,861) and Grant (US 6,348,780) disclose converters utilizing a hysteretic comparator. Ramsey (US 6,215,288) discloses a variable current threshold that is a function of the switching frequency.
